Manufacturer and Provider of Telecom Equipment

Product Code: FCCC-1143

Features & Applications:

The coil storage bracket shipped in three pieces and requires field assembly. This product includes banding slots, added to the vertical body extrusion portion of the unit for more versatility in the attachment schemes to the structures.

-Other Details

- Easy to handle
- Easy in installation onto structures
- Easy to assemble
- More versatile in the attachment schemes
- Extra lengths of ADSS storage
- Easy to maintain and re-enter
- Light weight
- Mountable to many types of structures
- Weather and bullet-resistant
- Appropriate mechanical resistance
- Long-life service
- Can be bolted or banded to structure

Electrical and mechanical specification

Product name	Coil storage
Metal component, Material	Aluminum
Resistance to humidity	100%
Cable diameter (mm)	10-12 mm
Resistance to corrosion	High
Temperature Operation(°c)	-60°C to 60°C
Salt spray test	700 hours
